## **DETAILED ACTION**

### ***Election/Restrictions***

1. This application contains claims directed to the following patentably distinct species of the claimed invention:

Specie 1 corresponds to Figure 1 as disclosed on Page 41 of the Specification and is directed toward a receiver with a time-sharing PCR extracting section, four PLLs and four STC counters.

Specie 2 corresponds to Figure 2 as disclosed on Page 45 of the Specification and is directed toward a receiver with one PCR extracting section, one PLL and one STC counter.

Specie 3 corresponds to Figure 3 as disclosed on Page 52 of the Specification and is directed toward a receiver with a time-sharing PCR extracting section, one PLL and one STC counter.

Specie 4 corresponds to Figure 4 as disclosed on Page 57 of the Specification and is directed toward a receiver with two PCR extracting sections, two PLLs and two STC counters.

Specie 5 corresponds to Figure 5 as disclosed on Page 63 of the Specification and is directed toward a receiver with a time-sharing PCR extracting section, one PLL and four STC counters.

Specie 6 corresponds to Figure 6 as disclosed on Page 65 of the Specification and is directed toward a receiver with two PCR extracting sections, one PLL and one STC counter.

Specie 7 corresponds to Figure 7 as disclosed on Page 69 of the Specification and is directed toward a receiver with two PCR extracting sections, one PLL and two STC counters.

Specie 8 corresponds to Figure 8 as disclosed on Page 74 of the Specification and is

Art Unit: 2611

directed toward a receiver with four PCR extracting sections, one PLL and four STC counters.

Specie 9 corresponds to Figure 9 as disclosed on Page 76 of the Specification and is directed toward a receiver with four PCR extracting sections, one PLL, one STC counter and a difference calculating section.

Specie 10 corresponds to Figure 10 as disclosed on Page 79 of the Specification and is directed toward a receiver with four PCR extracting sections, one PLL, one STC counter, a difference calculating section and a time-stamp rewriting section.

Applicant is required under 35 U.S.C. 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. Currently, Claim 2 is generic.

Applicant is advised that a reply to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to

be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.
